

The image shows a Jupyter Notebook interface. At the top, the title bar reads "B1205058_高斌_HW1 'Hello World'.ipynb" with a star icon. Below the title bar is a menu bar with "File", "Edit", "View", "Insert", "Runtime", "Tools", "Help", and "All changes saved". On the right side of the title bar are two icons: a crab and a cat. The main area of the notebook is divided into two sections: "Code" and "Text". The "Code" section contains the following Python code:

```
a = "↵"
b = "↵"
x = "Hello~ "
y = "world ♥ "

print(a + 5*x + 6*y + b + "\n \n \n \n \n \n why am I still here...")
```

The "Text" section displays the output of the code, which is a multi-line string:

```
↵ Hello~ Hello~ Hello~ Hello~ Hello~ world ♥ world ♥ world ♥ world ♥ world ♥ ↵

why am I still here...
```

At the bottom of the notebook, the text "HELLO WORLD HELLO WORLD B1205058_高斌_HW1" is displayed.

哈囉, 我以前就有一點點 Python 的基礎, 所以 “Hello World” 我只在玩玩而已. 雖然是這樣, 我還是有學到新知識, 譬如可以隨便放不同的符號, 或者是可以以加減乘除的方法列印文字, 都蠻新奇的~
